

NEW GENERATION PRECISION CLEANING

1. Save labour costs cleaning by using ultrasonics by 80%. Heating acid caustic baths is very expensive and dangerous.
2. No more exposure to harsh acids and caustics.
3. Run the machine for 8 hours a day at a cost of \$12.00. The normal method is super heating an acid or caustic for 48 hours to achieve same result.
4. Environmentally safe as using a bio chemical that can be disposed off in normal water separator. Don't have to pay huge amounts of money for disposal.
5. Precision cleaning that manual labour cannot achieve. Ultrasonics can get into places you cannot see.
6. Mining Industry, Hydraulics Industry, Engine Recondition Industry. Anywhere a precision clean is required before assembly.
